AI-Powered Private Data Lake

With CrushBank's AI you can build a smart data lake for your business from your documents, tickets and data, in real-time today and into the future. Fill gaps, gain visibility and create insights. CrushBank optimizes productivity with a single view that brings information right to your fingertips to resolve IT support tickets. All with safe and secure AI that you can trust.

How We Transform Your IT Support

- ✓ Use CrushBank Neuro conversational search to get answers from your company documents and data

- ✓ Automated budgeting of IT support tickets

- ✓ Auto classification of type, subtype and items

- ✓ Identify missing data and automatically create tickets to address them

- ✓ Generate ticket summaries and resolutions

- ✓ Integrations built on native APIs allow for real-time updating of system data within the platform

- ✓ Ingest data from all your favorite platforms

- ✓ Leverages text-based analytics and root cause reporting for evaluation of customer sentiment within tickets

What Sets Us Apart

- ✓ Simple onboarding
- ✓ Simple data ingestion
- ✓ Simple AI training
- ✓ Isolated customer tenants

- ✓ Secure AI from IBM watsonx
- ✓ Enterprise Security Protocols
- ✓ All your data inside a single pane presented in ConnectWise
- ✓ Crush your KPIs
