

# AI-Powered Private Data Lake

With CrushBank's AI you can build a smart data lake for your business from your documents, tickets and data, in real-time today and into the future. Fill gaps, gain visibility and create insights. CrushBank optimizes productivity with a single view that brings information right to your fingertips to resolve IT support tickets. All with safe and secure AI that you can trust.

## How We Transform Your IT Support

- ✓ Use CrushBank Neuro conversational search to get answers from your company documents and data
- ✓ Ingest data from all your favorite platforms
- ✓ Generate ticket summaries and resolutions
- ✓ Identify missing data and automatically create tickets to address them
- ✓ Integrations built on native APIs allow for real-time updating of system data within the platform
- ✓ Leverages text-based analytics and root cause reporting for evaluation of customer sentiment within tickets

## What Sets Us Apart

- ✓ Simple onboarding
- ✓ Simple data ingestion
- ✓ Simple AI training
- ✓ Isolated customer tenants
- ✓ Trustworthy AI from IBM watsonx
- ✓ Enterprise Security Protocols
- ✓ All your data inside a single results view
- ✓ Crush your KPIs
