# CRUSH BANK

CrushBank Neuro

Frontline turnover is averaging more than 50%, salary costs are increasing by 20% or more. Meanwhile, 90% of data is unsearchable, causing delays in solving problems. To address these issues, without simply increasing headcount, you need to better leverage your support team.

90%
of data is
unsearchable

(IBM Study)

50%+
Average new employees
each year through
turnover and growth

(CompTIA 2023)

It takes
4 months
to get a new employee
up to speed

(MSP Feedback)

Break out of this tangle of inaccessible data and disparate systems with CrushBank. CrushBank creates a powerful data lake for your company's information and makes everything searchable through an easy Q&A interface, using retrieval-augmented generation. Solve these challenges with CrushBank Neuro

Customization, Consistency, Governance, Easy Access

Key Features

Cost Efficiency and Time To Value	The service is consumption-based, making it a cost-effective choice. CrushBank provides a quick and efficient solution to data management needs without significant upfront investment.
Integration and Automation	Ingests data from all sources using a Universal API.
Private Data Lake	Secure data lake that provides users with easy access to information without the need for searching each system separately.
Controlled Information Sources	Data used for results is limited to corporate data sources. No mixing with public or Internet data, so answers are relevant and consistent. No corporate data is passed to public AI systems.
Enhanced Search Capability	CrushBank can extract specific information from a vast array of document types quickly and accurately.
Easy Access	Simply ask CrushBank Neuro questions through Microsoft Teams Chat.
Scalability and Customization	CrushBank is suitable for businesses of all sizes and is capable of managing thousands of documents. It offers scalability and customization options to meet specific business needs.

CrushBank Neuro
