

SmartArchive

Get long-term access to critical information needed for client support from legacy or end of life systems

CrushBank's innovative SmartArchive system streamlines the preservation of valuable IT support information from legacy systems

SmartArchive is initialized with a one-time ingestion into a private data lake of critical support data, including tickets, configuration details, and other relevant service documents. The entire store of information then becomes completely searchable.

By eliminating the need for costly licensing fees associated with old systems, SmartArchive provides significant cost savings. The service is scalable, with costs tailored according to the volume of items ingested, making it a cost-effective solution for businesses of all sizes seeking to safeguard their IT support records efficiently.

| Number of documents, tickets, configurations | Per month |
|--|-----------|
| Up to 50,000 | \$300 |
| Up to 100,000 | \$500 |
| Up to 150,000 | \$750 |
| Up to 500,000 | \$1,000 |
| Enterprise (10GB storage) | \$2,000 |

An unlimited number of users can access the information through the search interface
